SUMMARY

Full stack engineer who builds B2B platforms end to end: API, database, web and mobile. Scaled the NestJS API of a booking platform used by 1,000+ travel agencies, built its flight module and Flutter app, and shipped AI agents and integrations on top of it.

EXPERIENCE

Full Stack Developer (Freelance) — CATOCA — Jul 2026 – Present
Client work for a Colombian coffee exporter · catoca.cafe

- Built and maintain the online store, live at catoca.cafe (React, Vite, Vercel Functions): Wompi checkout signed on the server, verified payment webhooks and Gmail API emails.
- Building, in phases with the client, their internal sales system (NestJS, Drizzle, PostgreSQL, React): FIFO batch inventory, commissions, DIAN pre-invoices and a Siigo export; 100% test coverage.

Full Stack Web Developer — GEH Suites — Feb 2025 – Jun 2026
Hotel chain with 13 properties in Cartagena, Santa Marta and Bogotá, Colombia

- Designed, scaled and maintained the **NestJS + MongoDB** API of Booking Connect, a B2B booking platform used by **1,000+ travel agencies** and 1,400+ active users.
- Built the complete flight booking module and rebuilt the frontend as a **Flutter** mobile app (iOS/Android) on top of the existing API.
- Integrated **5 providers** (Autocore, My Tool, Amadeus, MaarLab, Cobre), including a dual-provider fallback so agencies never saw an outage of the main inventory provider.
- Built **Lucía**, an AI booking agent (**OpenAI API + MCP**) that created, managed and cancelled reservations and analyzed booking data for agencies and internal staff under the platform's permission model; handled **4,000+ bookings**.
- Built the petty cash and purchase-request system for the accounting team of **13 hotels** (Django REST Framework + PostgreSQL) and an invoicing RPA bot (email → Bitrix24 CRM → documents) that cut the team's operational time by **40%**.
- Built two more production agents (OpenCLAW): Federico, an accounting assistant that analyzed purchase patterns and generated reports, and an orchestrator that assigned tasks to the other agents and checked their work.
- Replaced a different TV provider at each hotel with one IPTV solution: a Flutter Android TV app with live channels, room service, the restaurant menu and a QR virtual intercom to call reception.

Full Stack Web Developer — Caritech — Jan 2023 – Jan 2025
Software development for the company's clients

- Built client web applications end to end, from requirements and data model to deployment: REST APIs (Django REST Framework, Node.js), PostgreSQL/MySQL/MongoDB, React admin panels and Flutter apps.

PROJECTS

Pargo — multi-tenant POS SaaS for restaurants — Jul 2026 – Present
Own product · MVP in client demos · built with AI-assisted development

- NestJS modular monolith on PostgreSQL with Row-Level Security tenant isolation; offline POS with signed sync, DIAN e-invoicing and recipe-based inventory ledger.
- Multi-provider AI (OpenAI, Anthropic, Gemini) with Zod-validated structured outputs and a prompt-injection eval suite; 11 ADRs and 751 automated tests (Testcontainers + Playwright).

Caminante — Flutter tourism app for Cartagena (2023), tech lead. Recognized as a high-impact project by SENA's Fondo Emprender.

SKILLS

Backend: TypeScript, NestJS, Fastify, Node.js, Python, Django REST Framework, PostgreSQL (RLS), MongoDB, MySQL, Redis/Valkey, Drizzle, REST, WebSockets

Frontend & mobile: React, Next.js, TanStack, Astro, Tailwind CSS, Flutter (iOS/Android, Android TV), PWA

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, Docker Compose, Nginx, Vercel

Testing & tooling: Vitest, Testcontainers, Playwright, Git/GitHub, OpenTelemetry

Integrations: Amadeus, Autocore, MaarLab (booking/flights) · Cobre, Wompi (payments) · Siigo, DIAN (accounting, e-invoicing) · Bitrix24, Monday (CRM) · webhooks

AI & agents: OpenAI API, MCP, tool calling, multi-provider LLMs (OpenAI, Anthropic, Gemini), structured outputs, prompt-injection evals, OpenCLAW, RPA

EDUCATION & LANGUAGES

Systems Engineering — Universidad de Cartagena (7 semesters completed) · Spanish: native · English: B2 (upper-intermediate)
